

We keep meaning to get it fixed.

The built in wardrobes and cupboards
Are packed to the brim, with clothes,
And odds and ends, the things we don't use.

The kitchen is small, but with enough room
For two to cook, and is full of cooking smells.

The bathroom is also small,
With only enough room for the essentials.

The flat has a quirk. The bath,
Which is hidden inside a closet.

For this flat was built in the days
When people did not have indoor baths,
And the lace workers who lived here would have
Used a tin one, pouring hot water into it.

As to the history of this town
Alexander Fleming was born in it.
